

Publication List

BOOKS

- [L-1]. *Statistical Monte-Carlo Methods* (with G. Casella) (2004, second and revised edition) Springer-Verlag, New York.
- [L-2]. *The Bayesian Choice: From decision-theoretic foundations to computational implementation* (2001, second and revised edition; 2007, paperback edition). Springer-Verlag, New York [De-Groot Prize 2004].
- [L-3]. *Case Studies in Applied Bayesian Data Science, CIRM Jean-Morlet Chair* (with Kerrie Mengersen and Pierre Pudlo, eds.) (2020). Springer International Publishing, New York.
- [L-4]. *Handbook of Mixture Analysis* (with Sylvia Frühwirth-Schnatter and Gilles Celeux, eds.) (2019). CRC Press, New York.
- [L-5]. *Bayesian Essentials with R* (with Jean-Michel Marin) (2013). Springer-Verlag, New York.
- [L-6]. *Méthodes de Monte-Carlo avec R* (with G. Casella) (2011) [traduction française]. Springer-Verlag, Paris.
- [L-7]. *Mixtures: Estimation and Applications* (with K.L. Mengersen and M.T. Titterington, eds.) (2011). John Wiley, Chichester.
- [L-8]. *Introducing Monte Carlo Methods with R* (with G. Casella) (2009). Springer-Verlag, New York.
- [L-9]. *Bayesian Core* (with Jean-Michel Marin) (2007). Springer-Verlag, New York.
- [L-10]. *Le Choix Bayésien : Principes et Pratique* (2006) [traduction française]. Springer-Verlag, Paris.
- [L-11]. *Statistical Monte-Carlo Methods* (with G. Casella) (1999). Springer-Verlag, New York.
- [L-12]. *Discretization and MCMC Convergence Assessment* (Editor) (1998). Lecture Notes 135, Springer-Verlag, New York.
- [L-13]. *Méthodes de Monte Carlo par chaînes de Markov* (1996). Economica, Paris.
- [L-14]. *The Bayesian Choice: a Decision-Theoretic Motivation* (1994). Springer-Verlag, New York.
- [L-15]. *L'Analyse Statistique Bayésienne* (1992). Economica, Paris.

INVITED EDITOR

- [Æ-1]. Special Issue on the future of Bayesian Computing (with Dennis Prangle), *Statistical Science* (2024).
- [Æ-2]. Special Issue on Bayesian inference: challenges, perspectives and prospects (with J.Rousseau and M. Jordan) *Philosophical Transactions of the Royal Society A* (2023).

- [Æ-3]. Special Issue on Markov Chain Monte Carlo, *Statistics and Computing* (2014).
- [Æ-4]. Special Issue on Big Bayes Stories (with Kerrie Mengersen), *Statistical Science* (2014).
- [Æ-5]. Special Issue on Advances in Markov Chain Monte Carlo, *J. Computational and Graphical Statistics* (2013).
- [Æ-6]. Special Issue on Monte Carlo methods in Statistics, *ACM Transactions on Computer Machinery* (2012).
- [Æ-7]. Special Issue on Bayesian Statistics Today, *Statistical Science* (2004).

PAPERS

- [P-1]. Persuasive Privacy (with J.J. Bon, J. Bailie and J. Rousseau) (2026) *Proceedings of the 43rd International Conference on Machine Learning*, Seoul, South Korea. PMLR 306. Available as arXiv:2601.22945.
- [P-2]. On integral priors for multiple comparison in Bayesian model selection (with D. Salmerón and J. Antonio Cano) (2026) *International Statistical Review* (in press). Available as arXiv:2406.14184. doi:10.1111/insr.70028
- [P-3]. Prequential posteriors (with S. Sinha-Roy, R.G. Everitt and R. Dutta) (2026) *Japanese Journal of Statistics and Data Science* (in press). Available as arXiv:2511.17721.
- [P-4]. Approximating evidence via bounded harmonic means (with D. Naderi, K. Kamary and D. Wraith) (2026) *Statistics and Computing* **36**(3), 120. doi:10.1007/s11222-026-10875-z
- [P-5]. Sampling using adaptive regenerative processes (with H. McKimm, A. Wang, M. Pollock, and G.O. Roberts) (2025) *Bernoulli* **31** (1), 509–536.
- [P-6]. Simulation of signed mixtures (with J. Stoehr) (2025) *Statistics and Computing* **35**(9), 1–21.
- [P-7]. The importance Markov chain (with C. Andral, R. Douc and H. Marival) (2024) *Stochastic Processes and their Applications* **171**, 104316.
- [P-8]. Generalized Poisson difference autoregressive processes (with G. Carallo and R. Casarin) (2024) *International Journal of Forecasting* **40**(4), 1359–1390. doi:10.1016/j.ijforecast.2023.11.009
- [P-9]. Living on the Edge: An Unified Approach to Antithetic Sampling (with Roberto Casarin, Radu Crau, and Lorenzo Frattarolo) (2024) *Statistical Science*, **39**(1), 115–136.
- [P-10]. Computing Bayes: from Then 'til Now (with G. Martin and D. Frazier) (2024) *Statistical Science*, **39**(1), 3–19.
- [P-11]. Approximating Bayes in the 21st Century (with G. Martin and D. Frazier) (2024) *Statistical Science*, **39**(1), 20–45.
- [P-12]. Insufficient Gibbs sampling (with A. Luciano and R. Ryder) (2024). *Statistics and Computing* **34**(4), 1573–1375.

- [P-13]. pmclib: Population Monte Carlo library (with Karim Benabed, Olivier Cappé, Jean-François Cardoso, Gersende Fort, Martin Kilbinger, Simon Prunet, and Darren Wraith) (2022) *Astrophysics Source Code Library*, ascl: 2211.008.
- [P-14]. Rethinking the Effective Sample Size (with V. Elvira and L. Martino) (2022) *International Statistical Review* **90**(3), 525–550. doi:10.1111/insr.12500
- [P-15]. NEO: Non Equilibrium Sampling on the Orbits of a Deterministic Transform (with Thin, A., Janati El Idrissi, Y., Le Corff, S., Ollion, C., Moulines, E., Doucet, A., and Durmus, Alain) (2021). *Advances in Neural Information Processing Systems*, **34**, 17060–17071.
- [P-16]. A Bayesian Generalized Poisson Model for Cyber Risk Analysis (with Carallo, G. and Casarin, R.) (2021) *Mathematical and Statistical Methods for Actuarial Sciences and Finance*, 123–128.
- [P-17]. Componentwise approximate Bayesian computation via Gibbs-like steps (with Clarté, G., Ryder, R.J. and Stoehr, J.) (2021) *Biometrika*, **108** (3), 591–607.
- [P-18]. Rao–Blackwellisation in the Markov Chain Monte Carlo Era (with G.O. Roberts) (2021) *International Statistical Review*, **89**, 237–249.
- [P-19]. Expectation propagation as a way of life (with A. Vehtari, A. Gelman, T. Sivula, P. Jylänki, D. Tran, S. Sahai, P. Blomstedt, J.P. Cunningham, and D. Schiminovich) (2020) *Journal of Machine Learning*, **21**(17), 1-53.
- [P-20]. Coordinate sampler: a non-reversible Gibbs-like MCMC sampler (with Wu Changye) (2020) *Statistics and Computing* **30**, 721-730.
- [P-21]. Model Misspecification in ABC: Consequences and Diagnostics (with D. Frazier and J. Rousseau) (2020) *Journal of the Royal Statistical Society. Series B*, **82**(2), 421-444.
- [P-22]. Accelerating Metropolis-Hastings algorithms by delayed acceptance (with M. Banterle, C. Grazian, and A. Lee) (2019) *Foundations of Data Science* **1**(2), 103-128.
- [P-23]. On parameter estimation with the Wasserstein distance (2019) (with E. Bernton, P.E. Jacob, and M. Gerber) (2019) *Information and Inference* **8**(4), 657-676.
- [P-24]. Inference in generative models using the Wasserstein distance (with E. Bernton, P.E. Jacob, and M. Gerber) (2019) *J. Royal Statistical Society Series B* **81**(2), 235-269.
- [P-25]. Auxiliary likelihood-based approximate Bayesian computation in state space models (with G.M. Martin, B.P.M. McCabe, D.T. Frazier, and W. Maneesoonthorn) (2019) *J. Computational and Graphical Statistics* **28**, 1–34.
- [P-26]. Abandon statistical significance (with B. McShane, D. Gal, A. Gelman, and J. Tackett) (2019). *The American Statistician* **73** (1), 235-245.
- [P-27]. Accelerating MCMC algorithms (with Elvira V., Tawn N., and Wu C.) (2018) *WIREs Computational Statistics* **10** e1435.
- [P-28]. Asymptotic properties of Approximate Bayesian Computation (with D. Frazier, G. Martin, and J. Rousseau) (2018) *Biometrika* **105**(3), 593–608.
- [P-29]. Jeffreys priors for mixture estimation (with C. Grazian) (2018). *Computational Statist. Data Analysis* **121**, 149–163.

- [P-30]. Weakly non-informative priors for location-scale mixtures (with K. Kamary, and K. Lee) (2018) *J. Computational & Graphical Statist.* **27**:4, 836-848.
- [P-31]. ABC random forests for Bayesian parameter inference (with L. Raynal, J.-M. Marin, P. Pudlo, and V. Ribatet) (2018) *Bioinformatics* **35**(10), 1720-1728.
- [P-32]. Reliable ABC model choice via random forest (with Pudlo, P., Marin, J.M., Cornuet, J.M, and Estoup, A.) (2016) *Bioinformatics* 32(6), 859–866.
- [P-33]. Bayesian estimation of small effects in exercise and sports science (with K.L. Mengersen , C.C. Drovandi, D.B. Pyne, and C.J. Gore) (2016) *PLOS One* **11**(4): e0147311.
- [P-34]. Importance Sampling Schemes for Evidence Approximation in Mixture Models (with K. Lee) (2016) *Bayesian Analysis* **11**(2), 573–597.
- [P-35]. The expected demise of the Bayes factor (2016) *J. Mathematical Psychology* **72**, 33—37.
- [P-36]. Objective Bayesian hypothesis testing in binomial regression models with integral prior distributions (with Salmeron, D. and Cano, J.A.) (2015). *Statistica Sinica* **25**(3), 1009–1023.
- [P-37]. Letter on *Revised evidence for statistical standards* (with A. Gelman) (2015). *Proc. National Academy Sciences* **111**(19), E1935.
- [P-38]. Bayesian computation: a perspective on the current state, and sampling backwards and forwards (with Green, P.J., Łatuszyński, K. and Pereyra, M.) (2015). *Statistics and Computing* **25**(4), 835–862.
- [P-39]. Relevant statistics for Bayesian model choice (with Marin, J.-M., Pillai, N. and Rousseau, J.) (2014). *Journal of the Royal Statistical Society Series B* **76** (5), 833–859.
- [P-40]. Constraining the thick disc formation scenario of the Milky Way (with Robin, A.C., Reyle, C., Fliri, J., Czekaj, M. and Martins, A. M. M.) (2014). *Astronomy & Astrophysics* **569**, A13.
- [P-41]. Pre-processing for approximate Bayesian computation in image analysis (with M.T. Moores, C.C. Drovandi, K.L. Mengersen) (2014) *Statistics and Computing* **25**(1), 23–33.
- [P-42]. Two discussions of the paper “Bayesian measures of model complexity and fit” by D. Spiegelhalter et al. (with E. Moreno and F.-J. Vazquez-Polo) (2014) *J. Royal Statistical Society, Series B* **76**(3), 486.
- [P-43]. On the Jeffreys–Lindley paradox (2014). *Philosophy of Science* **81**(2), 216–232.
- [P-44]. Inherent difficulties of non-Bayesian likelihood-based inference, as revealed by an examination of a recent book by Aitkin (with Gelman, A. and Rousseau, J.) (2013). *Statistics and Risk Modelling* **30**, 1001-1016.
- [P-45]. Bayesian computation for intractable normalizing constants (with Atchadé, Y. and Lartillot, N.) (2013) *Brazilian Journal of Statistics* **27**(3), 417–436.
- [P-46]. “Not only defended but also applied”: The perceived absurdity of Bayesian inference (with discussion and rejoinder) (with Gelman, A.) (2013). *The American Statistician* 67(1), 1–5.
- [P-47]. Bayesian computation via empirical likelihood (with Pudlo, P. and Mengersen, K.) (2013) *Proceedings of the National Academy of Sciences*, **110**(4), 1321-1326.

- [P-48]. *Error and Inference* : an outsider stand on a frequentist philosophy (2013). *Theory and Decisions* **73**(1), 1–15.
- [P-49]. Estimation of demo-genetic model probabilities with Approximate Bayesian Computation using linear discriminant analysis on summary statistics (with Estoup, A., Lombaert, E., Marin, J.-M., Guillemaud, T., Pudlo, P., and Cornuet, J.-M.) (2012) *Molecular Ecology Ressources* **12**(5), 846–855.
- [P-50]. Adaptive Multiple Importance Sampling (with Cornuet, J.M., Marin, J.-M. and Mira, A.) (2012) *Scandinavian J. Statist.* **39**(4), 798–812.
- [P-51]. Regularization in regression: Comparing Bayesian and frequentist methods in a poorly informative situation (with Celeux, G., El Anbari, M., and Marin, J.-M.) (2012) *Bayesian Statistics* **07**(2), 477–502.
- [P-52]. Improving the convergence properties of the data augmentation algorithm with an application to Bayesian mixture modeling (with Hobert, J.P., and Roy, V.) (2012). *Statistical Science* **3**(2), 332–351.
- [P-53]. A short history of Markov Chain Monte Carlo (with G. Casella) (2011). *Statist. Science* **26**, 1, 102–115.
- [P-54]. Lack of confidence in approximate Bayesian computational (ABC) model choice (with J.M. Cornuet, J.M. Marin and N.S. Pillai) (2011). *Proceedings of the National Academy of Sciences*, **108**(37), 15112–15117 (Open Access).
- [P-55]. A vanilla Rao–Blackwellisation of Metropolis-Hastings algorithms (with R. Douc) (2011). *Annals of Statistics* **39**(1), 261–277.
- [P-56]. Using parallel computation to improve independent Metropolis–Hastings based estimation (with P. Jacob and M. Smith) (2011). *J. Computat. Graphical Statistics* **20**(3), 616–635.
- [P-57]. Approximate Bayesian Computational methods (with J.-M. Marin, P. Pudlo, and R.J. Ryder) (2011), *Statist. Computing* **21**(2), 289–291.
- [P-58]. Re-reading Keynes’ *Treatise on Probability* (2011). *International Statistical Review* **79**(1), 1–15.
- [P-59]. In defense of model-based inference in phylogeography (with Beaumont, M.A., Nielsen, R., Hey, J., Gaggiotti, O., Knowles, L., Estoup, A., Mahesh, P., Coranders, J., Hickerson, M., Sisson, S., Fagundes, N., Chikhi, L., Beerli, P., Vitalis, R., Cornuet, J.-M., Huelsenbeck, J., Foll, M., Yang, Z., Rousset, F., Balding, D. and Excoffier, L.) *Molecular Ecology* **19**(3), 436–446 (2010).
- [P-60]. Letter on *Incoherent Phylogeographic Inference* (with Berger, J.O., Fienberg, S. and Raftery, A.). *Proc. National Academy Sciences* **107** (41) E157 (2010).
- [P-61]. Bayesian model comparison in cosmology with population Monte Carlo. (with M. Kilbinger, D. Wraith, K. Benabed, O. Cappé, J.-F. Cardoso, G. Fort, S. Prunet and F. Bouchet). *Monthly Notices of the Royal Astronomical Society: Letters*. **405**(4), 2381 - 2390 (2010).
- [P-62]. Properties of nested sampling (with N. Chopin). *Biometrika* **97**(3):741–755 (2010).

- [P-63]. *A Search for Certainty*: A critical assessment. *Bayesian Analysis* (with discussion) **5**(2), 213-222 (2010).
- [P-64]. On variance stabilisation by double Rao-Blackwellisation (with A. Iaccobucci and J.-M. Marin) *Computational Statistics and Data Analysis* **54**(2), 698–710 (2010).
- [P-65]. On resolving the Savage-Dickey paradox (with J.-M. Marin). *Electronic Journal of Statistics* **4**, 643-654 (2010).
- [P-66]. On the relevance of the Bayesian approach to Statistics (2010). *Review of Economic Analysis* **2**, 139–152.
- [P-67]. Estimation of cosmological parameters using adaptive importance sampling (with Wraith, D., Kilbinger, M., Benabed, K., Cappé, O., Cardoso, J.-F., Fort, G., and Prunet, S.). *Physical Review D*, **80**, 023502 (2009).
- [P-68]. Adaptivity for ABC algorithms: the ABC-PMC scheme. (with M. Beaumont, J.-M. Marin and J.-M. Cornuet) *Biometrika* **54**, 698–710 (2009).
- [P-69]. Adaptive importance sampling in general mixture classes (with O. Cappé, R. Douc, A. Guillin and J.-M. Marin) *Statistics and Computing* **18**, 447-459 (2009).
- [P-70]. Letter on *Model choice versus model criticism* (with K.L. Mengersen and C. Chen). *Proc. Nat. Acad. Sciences* **107**(3) E5 (2009).
- [P-71]. Harold Jeffreys' Theory of Probability revisited (with N. Chopin and J. Rousseau) *Statistical Science* (with discussion) **24**(2), 141–194 (2009).
- [P-72]. A Bayesian reassessment of nearest-neighbour classification (with J. Cucala, J.-M. Marin and D.M. Titterton) *J. American Statistical Association* **104**(485), 263–273 (2009).
- [P-73]. Inferring population history with DIY ABC: a user-friendly approach to Approximate Bayesian Computation. (with J.-M. Cornuet, F. Santos, M.A. Beaumont, J.-M. Marin, D.A. Balding, T. Guillemaud, and A. Estoup) *Bioinformatics* **24**(23), 2713–2719 (2008).
- [P-74]. Are risk agents more optimistic? A Bayesian estimation approach (with S. Ben Mansour, E. Jouini, J.-M. Marin, and C. Napp) *Journal of Applied Econometrics* **23**(6), 843-860 (2008).
- [P-75]. On some difficulties with some posterior probability approximations (with J.-M. Marin) *Bayesian Analysis* **3**(2), 427–442 (2008).
- [P-76]. Bayesian mixture models in a longitudinal setting for analysing sheep CAT scan images (with C.L. Alston, K.L. Mengersen, J.M Thompson, P.J. Littlefield, D. Perry, D, and A.J. Ball) *Computational Statistics and Data Analysis*, 51(9), 4282–4296 (2007).
- [P-77]. Convergence of adaptive sampling schemes (with R. Douc, A. Guillin and J.-M. Marin) *Annals of Statistics* **35**(1), 420–448 (2007).
- [P-78]. Minimum variance importance sampling via population Monte Carlo (with R. Douc, A. Guillin and J.-M. Marin) *ESAIM Probability and Statistics* **11**, 427–447 (2007).
- [P-79]. Confidence bands for simulation output (with W. Kendall and J.-M. Marin) (2007) *Statistics and Computing* **17**(1) 1–10 (2007).

- [P-80]. Bayesian optimal design via interacting MCMC (with B. Amzal, F. Bois and E. Parent) *J. American Statist. Association* **101**(474), 773–785 (2006).
- [P-81]. Integral equation solutions as prior distributions for model selection (with J.A. Cano and D. Salmerón) (2006) *TEST* **13**(2), 445–463 (2006).
- [P-82]. Deviance criteria in missing data models (with G. Celeux, F. Forbes and D.M. Titterington) *Bayesian Analysis* (with discussion) **1**(4), 651–674 (2006).
- [P-83]. Sélection bayésienne de variables en régression linéaire (with G. Celeux and J.-M. Marin) *J. Société Française de Statistique*, **147**(1), 1–26 (2006).
- [P-84]. Using a Markov chain to construct a tractable approximation of an untractable probability distribution (with Hobert, J.P. and Jones, G.L.) *Scandin. Statist.* **33**(1), 37–61 (2006).

R PACKAGES

- [S-1]. `abcrf`, with R codes for ABC model choice and parameter inference via random forests (contributions to the methodology and the associated paper, 2017)
- [S-2]. `Ultimixt`, with R codes for the Bayesian analysis of unidimensional mixture distributions via location-scale reparameterisation (contributions to the methodology and the associated paper, 2017)
- [S-3]. `bayess`, with R programs used in the books "Bayesian Essentials with R" and "Bayesian Core" (co-author with J.M. Marin, 2013)
- [S-4]. `ARAMIS`, with R codes for the Adaptive Multiple Importance Sampler (AMIS) algorithm (contributions to the methodology and the associated paper, 2013)

[S-5]. `mcs`, with R programs used in the book “Introducing Monte Carlo Statistical Methods” (2009)

SOLUTION MANUALS

[S-1]. The complete solution manual to *Bayesian Essentials with R* (with J.-M. Marin) (2007), [arxiv:1503.04662](#).

[S-2]. Solutions to odd-numbered exercises of *Introducing Monte Carlo Methods with R* (with G. Casella) (2010), [arxiv:1001.2906](#).

[S-3]. The complete solution manual to *Bayesian Core* (with J.-M. Marin) (2007), [arxiv:0910.4696](#).
